Quality Assurance Lead

Description

Are you looking for a new opportunity where you will have a concrete impact on the organization and where you will be able to build a quality assurance department?

The **Quality Assurance Lead** will work in an Agile environment and will be required to work closely with our developers. The candidate will be responsible for developing and implementing procedures and best practices in terms of quality assurance. Reporting to the Director of Product & Software Development, this person's responsibilities include but aren't limited to:

Responsibilities

- Develop and execute manual and automatic test plan documents, test cases and scripts;
- Analyze technical documents to extract requirements, scenarios and test cases to document in the test tools;
- Perform automatic and manual tests and documents and analyze bugs;
- Establish and implement quality assurance procedures throughout the development process;
- Identify and implement best practices;
- Develop quality assurance and testing strategies in an Agile environment;
- All other related duties.

Qualifications

- Bachelor's degree in computer science, software engineering or a related field;
- Between 3 and 5 years of experience in a similar position;
- Experience with test automation tools such as Ranorex, Selenium or others;
- Experience in an Agile environment;
- Excellent communications skills;
- Demonstrate autonomy, resourcefulness and leadership.

Job Benefits

- A growing and constantly evolving work environment
- Opportunities for career development
- Group insurance and access to telemedicine
- An employer RRSP-contribution
- Health and wellness program
