Senior DevOps

Description

Join Synergy Medical's growing software development team! Reporting to the Director, Software Development Product Management, the **Senior DevOps** will be responsible for automating the deployment of releases in our test environment. The incumbent's responsibilities will also include, but not be limited to, the following:

Responsibilities

- Oversee the migration of existing solutions to the world of containers.
- Design and develop automated deployments.
- Accelerate our releases.
- Participate in development and migration to a Cloud architecture.
- Implement CI/CD pipelines.
- Define and implement all the tools necessary for the work of developers and ensure their proper use.
- Promote automation best practices across the development team.

Qualifications

- Bachelor's degree in computer engineering or in a field deemed equivalent
- Minimum of 5 years of experience in DevOps, release automation or other related tasks
- Experience with CI/CD platforms (Gitlab, Bitbucket, Azure DevOps)
- Proficiency with Docker
- Experience with one or more Cloud platforms (AWS, Azure) is a major asset
- Experience with automation of Windows deployment is an asset
- Bilingual (English/French)

Job Benefits

- A growing and constantly evolving work environment
- Opportunities for career development
- Up to 4% in employer RRSP contribution
- Group insurance and access to telemedicine
- Health and wellness program
- Great team and great clients
- Full-time work from home and occasional office presence required
